

Welcome to StormSensor!

StormSensor, a climate technology startup, is expanding our team! StormSensor works with cities across the U.S. to track how water moves through their storm, sewer, and coastal infrastructure. Our high-resolution data networks monitor flow and temperature every 5 minutes, while our proprietary algorithms and intuitive software provide cities with simple, practical insights to help them adapt to system- and climate-driven risks from flooding, sea level rise, tidal surges, and storms.

We are searching for a **Lab and Warehouse Manager** who is passionate about creating vibrant communities and integrates perfectly with our team and our values: creativity, integrity, unity, courage, and curiosity.

This is a full-time position, however there is some flexibility in hours to accommodate student or parent schedules.

About You

You are a self-starter who works well alone and in small teams that is detail oriented and organized. You enjoy creating and following efficient procedures that improve workflow. You like hands on work and solving interesting problems. You are located in Seattle/Everett.

In addition, you are:

- Naturally inquisitive. Curiosity is a strength!
- An excellent communicator with strong written and verbal communication skills.
- Able to solve any problem you put your mind to, or at the very least you can figure out the best person to solve that problem.
- Convinced that anything is possible! It's just a matter of figuring out how.
- Comfortable being uncomfortable. You have the courage to get through tough situations and tough times.
- A mentor. You can communicate collaboratively with everyone, both team members and customers.
- Egoless (or at least as much as is reasonable for a human to be). You'll make mistakes, you'll fix mistakes, you won't judge others' mistakes, and you'll grow from each experience.

Roles/Responsibilities

- Maintain inventory, including tracking lead times and future stock requirements
- Manage manufacturing purchase orders and reorder of stock
- Shipping and receiving of stock
- Conduct quality control tests on new equipment and sensors
- Maintain warehouse and lab facilities
- Help developing, maintaining, and improving test benches

Requirements/Skills

- 0-3 years of work experience in warehouse and/or lab
- Experience with testing and following equipment testing procedures
- Comfortable with technology
- Proficient in Microsoft Office products (Excel, Word, Outlook, etc.)
- Strong verbal and written communication skills
- Experience with inventory systems, especially Fishbowl, is preferred but not required
- Experience running pre-made scripts (Python, shell, etc.) is preferred but not required
- Self-motivated and reliable with excellent time management and organizational skills: we can count on you, and you can count on us to do our jobs and support each other.
- Fully vaccinated for COVID-19.

Benefits & Perks

- Compensation: DOE
- Monthly health insurance stipend
- Unlimited paid time off
- Passionate, collaborative, and generally awesome co-workers
- Coming October 1: comprehensive benefits package, including company-sponsored health insurance

Apply

- To apply, send your CV and Resume to jobs@stormsensor.io with “Lab and Warehouse Manager” in the subject line.
